

CROSSWINDS DENTAL

APRIL 2018

APRIL IS ORAL CANCER AWARENESS MONTH! **DID YOU KNOW?**

- Men are twice as likely to be diagnosed with oral cancer as women.
- Most people diagnosed are age 55 and older.
- Tobacco of any form increases your risk for oral cancer.
- Alcohol also increases your risk, especially if you consume 2 or more drinks per day.
- People who are in the sunlight for long periods of time run the risk of lip cancer.
- If your diet does not include fruits and vegetables, your risk for oral cancer increases.

Rest assured we do a thorough oral cancer screening at each of your dental wellness visits.

Do you know about our referral program?

For every patient that you refer you get a **\$50** in office credit to be used toward future dental treatment!
